

AI, DATA SCIENCE, EDTECH, WEB PRODUCTS

Adam Lachkar

Engineering student at EMINES - UM6P and founder at EFAIX, building practical AI systems, education products, and polished web experiences for real users.

Benguerir, Morocco adam.lachkar@emines.um6p.ma +212 770 282 379 github.com/adam1861

PROFILE

Product-minded engineering student focused on applied machine learning, data workflows, cyber security foundations, and public-facing web execution.

CORE STACK

Python Pandas NumPy
Scikit-learn XGBoost
TensorFlow JavaScript
TypeScript Git Linux
Power BI Splunk Hydra

DATA SKILLS

- Exploratory data analysis
- Feature engineering
- Classification and clustering
- Forecasting workflows
- Model evaluation
- Computer vision basics
- RAG foundations

CERTIFICATES

- ML Specialisation
- Pre Security

01 SELECTED PROJECTS

Pricing Engine

2026

Machine learning pricing workflow turning structured business signals into pricing decision support.

Telecom Customer Churn Prediction

2026

End-to-end churn classification pipeline covering cleaning, EDA, encoding, and retention-focused modeling.

Credit Card Fraud Detection

2026

Fraud detection workflow focused on imbalanced classification, feature work, and practical evaluation.

Weather Forecasting System

2026

Forecasting project combining XGBoost, NASA weather data, location inputs, and an interactive web layer.

Metal Quality Control

2025

Computer vision workflow for defect detection and segmentation in industrial metal inspection scenarios.

02 PRODUCT & WEB WORK

EFAIX

Founder and builder across public brand, academy, LMS, and education delivery surfaces.

Client Web Builds

Shipped polished web experiences for Starteady, Auramaking, and Icodex Academy.

03 EDUCATION & FIT

EMINES - Mohammed VI Polytechnic University

Engineering student with a growing focus on AI, data science, and technical systems with real users.

BEST FIT

AI/ML internships, product engineering internships, education technology systems, freelance web builds, and serious technical collaborations.
