ADAM LACHKAR

AI & DATA SCIENCE | STRATEGY & CONSULTING

PROFILE

Engineering student at EMINES–UM6P focused on AI, Data Science and strategy. Founder of EFAIX, with hands-on experience in AI products, pricing analytics and enterprise software

EDUCATION

EMINES - UM6P 2023 - 2028
Engineering Degree in Industrial Management

WORK EXPERIENCE

- EFAIX** (Founder & CEO) SEP 2025 – PRESENT
 - Building an AI-powered B2B education platform.
 - Leading product, AI, software, and business strategy.
- EdgeFlow Pricing** (AI / Data Intern) JUN 2026
 - Adapted an AI pricing engine for agriculture.
 - Worked on data, features, competition, and pricing.
- Thales** (AI & Full-Stack Intern) Jul 2026
 - Built AI features for the SecureGRC platform.
 - Worked on document understanding and compliance workflows.

PROJECTS

- AI Industrial Quality Control System** 2026
Computer Vision · U-Net · Python
 - Built an AI system for industrial defect detection and segmentation.
 - Developed a monitoring interface and automated quality reports.
- NASA Space Apps — AI Weather Forecasting** 2025
Machine Learning · XGBoost · Random Forest
 - Built a forecasting pipeline using NASA climate datasets.
 - Compared ML models and developed an interactive prediction interface.
- Football Match Prediction Platform** 2024
Machine Learning · Random Forest · Web App
 - Built a Random Forest model to predict football match outcomes.
 - Developed a web interface to visualize predictions and probabilities.

LEADERSHIP & ACTIVITIES

- Vice President — BDE EMINES
- President — E++ Computer Science Club
- Community member — Math&maroc
